

QR Payment & Multi-Site Dashboard

Pricing and feature overview for self-service car wash operators

Goal: make QR payments easier for customers while giving operators clearer visibility across sites, bays, revenue, bonus offers and failed-start activity.

Recommended Pricing

Pilot site setup	£799 one-off	One location to test QR payments, reporting, bonus credit offers and the dashboard before wider rollout.
Monthly per site	£199/month	Single-site QR payment page, dashboard access, reporting, support and updates.
Multi-site rollout	From £149/site/month	For operators with multiple locations. Includes site-level reporting and grouped performance visibility.
Group dashboard	From £399/month	Head-office view across all sites: revenue, payments, busiest hours, bonus performance and alerts.

Key Features & Why They Matter

Feature	Benefit
QR payment pages by bay or site	Customers can pay quickly from their phone without waiting for staff or handling coins. This can increase convenience and reduce friction.
Multi-site dashboard	Owners can see performance across locations in one place instead of checking each site separately.
Bonus credit offers	Promotions such as pay £5 and get £6 total credit encourage higher top-ups and can lift average spend.
Live-style revenue tracking	Operators can monitor today, week, month and all-time activity with clear transaction visibility.
Projected revenue	Forecasts help operators understand whether the day is on track and spot quieter periods early.
Recommended bonus packs	The dashboard can suggest which offer to keep live based on sales patterns, helping operators make better pricing decisions.
Failed-start and refund visibility	If a payment succeeds but a machine does not start, the operator can see the issue faster and support the customer better.
Remote setup	Most setup can be done remotely: QR pages, dashboard, payment configuration and printable QR codes can be prepared without travelling to site.

Customisation

We are open to customisation around your existing setup, including branding, payment flow, bonus offers, staff access, multi-site controls, reports, customer messages, integrations and any operator-specific features required.

ScudoSystem - software development, QR payment systems, apps, dashboards and automation tools.
