EV QR Charging Payment & Dashboard

A QR payment experience for destination chargers, car parks, hotels, gyms and private charging sites. Drivers can pay without downloading an app while operators track usage and revenue.

scudosystems.com/demo-ev-01	scudosystems.com/demo-ev-01/dashboard PIN: 2026

Why this matters

No app charging	Drivers can scan and pay without downloading another charging app.
Flexible charging modes	Supports fixed top-up, kWh selection or time-based charging.
Operator reporting	Track revenue, sessions, connector activity, payment modes and projected revenue.
Bonus credit offers	Promote offers such as pay £5 and receive £6 charging credit.

Commercial model

Pilot site setup	From £999 one-off	QR pages, dashboard setup, charger labels, branding and launch support.
Monthly per site	From £249/month	Hosting, dashboard, reporting, payment flow maintenance and support.
Multi-site	From £199/site/month	Discounted rollout and central reporting for multiple locations.
Custom integrations	Quoted separately	Charger/OCPP, tariffs, connector mapping, APIs or bespoke reporting.

Features included

QR charging page, fixed top-up, kWh/time modes, Apple Pay / Google Pay / card payments, bonus credit offers, connector status, recent sessions, projected revenue, payment modes and smart recommendation controls.

Customisation

The system can be customised around charger hardware, kWh/time pricing, connector labels, branding, payment flows and reporting requirements.
