

EV QR Payment & Charging Dashboard

Operator pricing and features

A QR payment and reporting system for EV charging operators who want app-free driver payments, flexible charging options, bonus charging credit and clearer connector visibility.

Pricing

Package	Price	Includes
Pilot site setup	£999 one-off	One charging location set up for QR payments, connector labels, reports and dashboard access.
Monthly per site	£249/month	QR payment pages, flexible charge modes, dashboard, support and updates.
Multi-site rollout	From £199/site/month	Grouped reporting for operators with multiple charging locations.
Custom integration	Quoted separately	For charger/OCPP/payment-provider integrations or custom operational requirements.

Features

Feature	Benefit
QR payment by connector	Drivers can scan and pay without downloading an app.
Flexible charge modes	Drivers can choose fixed top-up, kWh amount or time-based charging.
Bonus charging credit	Examples: pay £5 and receive £6 charge credit, or pay £10 and receive £12 charge credit.
Connector dashboard	Operators can see active, available and faulted connectors.
Revenue reporting	Track today, week, month and all-time charging payments.
Projected revenue	Estimate likely end-of-day revenue from current activity.
Smart recommendations	Highlight the best payment mode or offer based on session behaviour.
Remote setup	QR pages, dashboard and printable connector QR codes can be prepared remotely.
Customisation	Branding, tariffs, connector labels, payment flow and reporting can be adapted.

Customisation

The system can be customised around existing charger hardware, payment provider, tariffs, bonus credit rules, kWh/time pricing, connector labels, branding and reporting requirements.

ScudoSystem - QR payment systems, dashboards, apps and automation tools.
